- Complete Administration of Different Branches

and much more...

Manage Records of Courses, Classes, Students, Teachers

Through SmartSchool you will be able to manage all the records of Session-wise Courses & Classes, Students Details, Teacher Records, Classes and Schedules etc. Student Accounts and Document management is the important features of the Application.

Student Registration and Enrollment

Student Registration, Enrollments and Classes Assignments are done quite comfortably. Student Enrollment History is maintained for every student separately.

Class Rosters for Students, Teachers and Classes

Perfect Class Scheduling has been an issue with the School Applications. Through SmartSchool you can create Class Schedules smartly with customized options which make your Scheduling perfect to be distributed to Students and Teachers.

Attendance Management

Student Attendance is entered with Remarks which may be also linked to the Parent review for their Students Progress.

Manage Student Marks and Grades

Marks obtained by the Student in Terminal and Final Exams can be recorded to generate Student Progress Reports, Mark Sheets and Transcripts.

Publish the Exam Results on Internet

Link the Examination Results to your website enabling students view the Results from their home.

Manage Fees and Student Accounts

The Students Billing and Payments can be recorded and different Financial Reports e.g. Day Report, Student Account Statements can be generated.

Document Management

Scanned copy of the relevant documents of Students can be uploaded to Student Accounts which may be accessed comfortably. This helps make your School paperless. Different Certificates, Student images, Identity Cards etc can also be uploaded to Student Account.

Alerts for Student Dues and Enrollment Expiry

Through Alerts, the Student Account Dues or Enrollment Expiry days can be tracked which helps following the student settle their account in advance.

Manage Assignments, Quiz, Circulars, and Messages for the Students

Assignments can be assigned to individual Students or the whole Class Students by the Teachers. Students can access these Assignments through their accounts. Similarly Quizzes may be arranged and Students are required to forward the solution to the Quiz. Circulars and Messages may also be flashed to the different Class Students by the School Management.

Permission Based Architecture

Access to different resources like Menu, View, Read, Edit, Update, Delete, Reports etc. is customizable for Users. User can access only those resources which they are permitted for.

Dynamic Key Based Security

Keys are changing dynamically everyday, which gives added Security to the Application and no User is allowed to Access Application while away from School. However, Trusted Users may Use Static Super Key to Access Resources from anywhere.

Manage Multiple School Branches from One Place!

You can manage your other School Branches from the same location. You have the option to maintain Databases of different School Branches at the same Server keeping at a Secure Place.

Customizable As Per Your Requirements

The Application will be customized as per your exact requirements if requested.
