Manage All the Exams, Tests, Quizzes and Candidate Screenings etc.

Though TestCenter you will be able to manage to conduct all your multiple choice exams and tests very quickly and effectively. It can also be used for candidate screening purposes.

Online Exam Software

Manage Online/Offline Trainings with quick feedback

Manage your entire training curriculum through TestCenter and get benefited saving time and receive quick feedback from the candidates. All you need to create the customized question sets.

Completely Customizable Features

Customize Technologies, Exams, Question Sets, Marks and Time as per your criteria. This feature gives you prepare the right question sets without and hassles. Image can also be inserted with the questions which makes the questions more clear.

Customizable Answer Pattern

Customize the Question categories as two option radio buttons can be used for Yes/No or True/False questions. Similarly you can also set four option radio buttons or five option radio button answers. Check boxes can also be used similarly for selecting more than one choice for a question. Text boxes can be used for small answers.

Real-time Simulation of Exams and Tests

Clear question and answer settings along with the count down watch provides real time simulation so that students don't have any problem in understanding the things.

Negative Marking Options

Set your options for negative markings when ever the student marks wrong answers. This feature is unique and helps you evaluate the real test.

Key based Exam Selection

Provide all your students with a 15-digit key which is when entered after login, it takes automatically to the right exam and question set as per your settings. Date and time to start the exam can be set through which students can attempt the exam only at that given date and time.

Cost and Time Benefit

After implementing this system, you will be able to save the printing cost, stationery cost, evaluation cost etc. very effectively. You can also save time of your entire exam management team. The system is extremely useful if you arrange frequent exams and screening etc.

Quick Analysis of Exams

Through TestCenter, you will be able to analyze the performance of any students or the whole class at any point of time. This gives you more power to know about your students and class performance. Though this you can evaluate the progress and need to enhancements.

Candidate Screening

If you are an enterprise, TestCenter is going to be a very useful tool for your HR department. No matter how many candidates you need to screen, you can get the results and analysis of the candidates very quickly and without any extra expenses.

Permission Based Architecture

Access to different resources like Menu, View, Read, Edit, Update, Delete, Reports etc. is customizable for Users. User can access only those resources which they are permitted for.

Dynamic Key Based Security

Keys are changing dynamically everyday, which gives added Security to the Application and no User is allowed to Access Application while away from School. However, Trusted Users may Use Static Super Key to Access Resources from anywhere.

Manage Application at Multiple School Branches from One Place!

You can manage the application running at other School Branches from the same location. You have the option to maintain Databases for different Branches at the same Server keeping at a Secure Place.

Customizable As Per Your Requirements

The Application will be customized as per your exact requirements if requested.
